

I listen to K-LOVE radio station every day during my commute to and from work. Its positive message gives me encouragement for my day, and fills me up so I can be more productive and focused at work. I believe K-LOVE does the same for thousands of listeners across the country, giving everyone access to hope and uplifting words. This impacts everyone in the community - people are much kinder and easier to deal with when they've been encouraged. Please don't take away the ability of stations like this one to broadcast across the country. Thank you for your time.
